History

This displays the notification events for your system in descending order to display the date, device type, specific sensor, or type of event. At least one app must have either Alarms, Troubles or Arm/Disarm enabled in Push Notifications for messages to be sent. The server will store up to 1000 messages for up to 60 days.

You may search your system history by clicking in the SEARCH field, entering the search topic, and clicking the search icon.

The alarm notifications for your system include:
