

Arming

Select the Arming tab of the Virtual Keypad to access the arming/disarming options for your system. Your system has been programmed to operate in one of four configurations: Area, All/Perimeter, Home/Away, or Home/Sleep/Away.

Area Systems

Your system may be divided into separate areas for burglary protection. Each area will have a custom name and can be turned on or off independently of other areas.

The screenshot shows the 'Arming' tab selected in the Virtual Keypad interface. The top header includes a weather widget with a sun icon, current temperature of 63°F (High 70, Low 45), and a forecast for tomorrow (High 55, Low 39) with a cloud and rain icon. The user's email 'rjones123@mail.com' and a dropdown menu 'XT50' are also visible. The main navigation bar includes 'Arming', 'Users', 'Schedules', 'Automation', 'Video', and 'History'. The 'Area Arming' section displays a table with columns for 'Area Name', 'Armed Status', and an 'Arm' button. The table lists three areas: PERIMETER, INTERIOR, and BEDROOMS, all currently 'DISARMED'. An 'Arm All' button is located at the top right of the table. Below the table is a '24 Hour History' section showing a log of events for Wednesday April 2, 2014, and Tuesday April 1, 2014.

Area Name	Armed Status	Arm
PERIMETER	DISARMED	Arm
INTERIOR	DISARMED	Arm
BEDROOMS	DISARMED	Arm

24 Hour History

Wednesday April 2, 2014

The Jones's Alarm System has a Bypass on the Front Door.
Message Sent at: 3:30 PM

User 20 has checked in at the Jones's Alarm System.
Message sent at: 3:38 PM

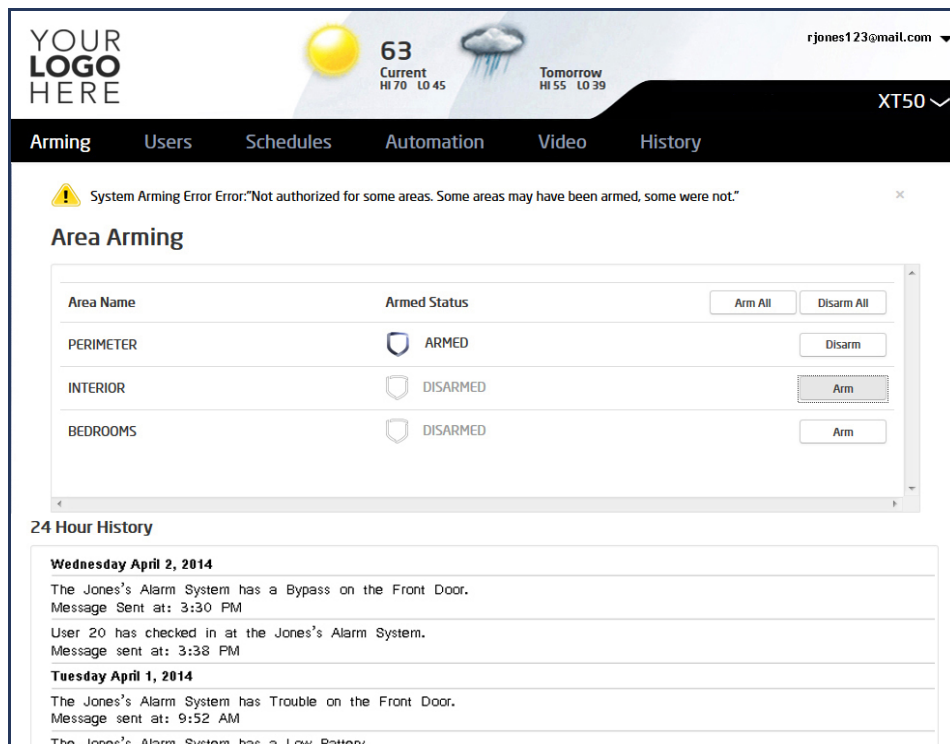

Tuesday April 1, 2014

The Jones's Alarm System has Trouble on the Front Door.
Message sent at: 9:52 AM

The Jones's Alarm System has a Low Battery.

Arm Area

Click the Arm button for the area(s) you wish to arm. When armed, the shield for that area displays blue with its Armed status. To arm all areas click Arm All. Access to areas may be limited through the users authority level in User Codes. When a user attempts to arm an unauthorized area, an error message is displayed.

Faulted Zones

If there are any faulted zones encountered during the arming process, an Alert Message is displayed listing the faulted zone(s) and options for Okay, Bypass or Stop.

Click **OKAY** to force arm the faulted zone.

Click **BYPASS** to bypass all faulted zones.

Click **STOP** to stop the system from arming. Correct the zone problem(s) and click the arming button again.

You may force arm or bypass any faulted zones. A zone that is force armed is restored into the system if it later returns to normal. A zone that is bypassed remains bypassed until the system is disarmed.

When armed, the shield for that area displays blue with its armed status.

Disarm Area

Click the Disarm button for the areas you wish to disarm. To disarm all areas, click the Disarm All button. When disarmed, the shield displays blank with the Disarmed status.

All/Perimeter Systems

Your burglary protection is divided into two areas:

- Perimeter and Interior - All arming arms both the Perimeter and the Interior of the system when leaving the building and no one is inside. Perimeter arming arms the exterior doors and windows and allows you to move freely about inside without setting off any interior alarms.

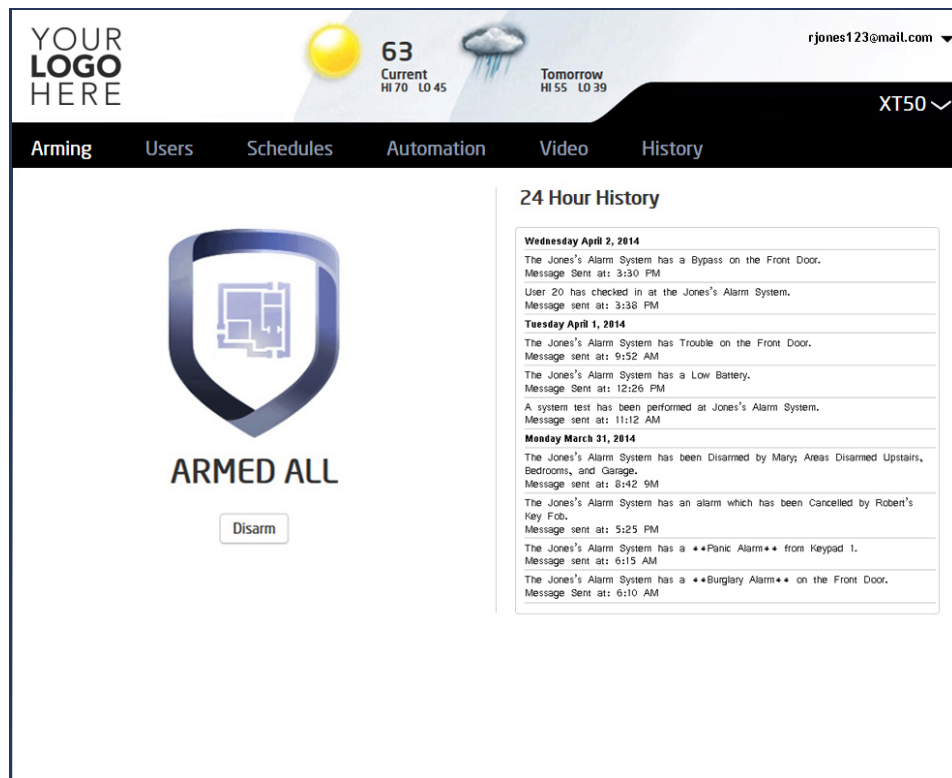

Arm All

Click the Arm All button. When armed, the shield displays blue with the Armed status and the All icon in the center.

Disarm All

Click the Disarm button. When disarmed, the shield displays blank with the Disarmed status, the Perimeter and Arm All buttons.

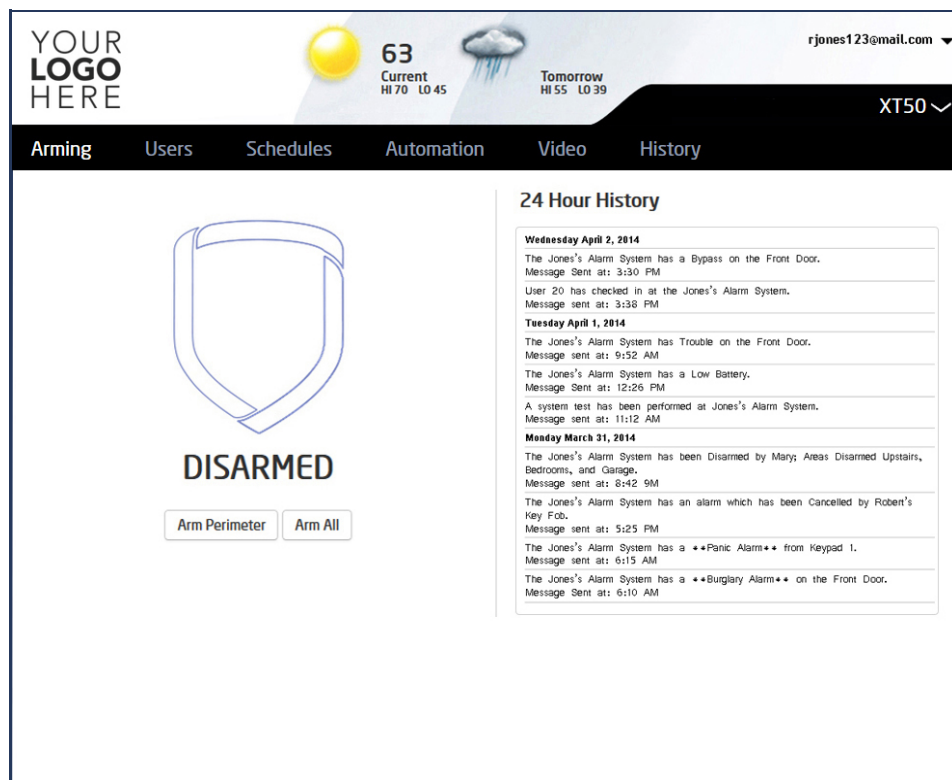

Arm Perimeter

Click the Arm Perimeter button. When armed the shield displays blue with the Armed status and the Perimeter icon in the center.

Disarm Perimeter

Click the Disarm button. When disarmed the shield displays blank with the Disarmed status, the Arm Perimeter and Arm All buttons

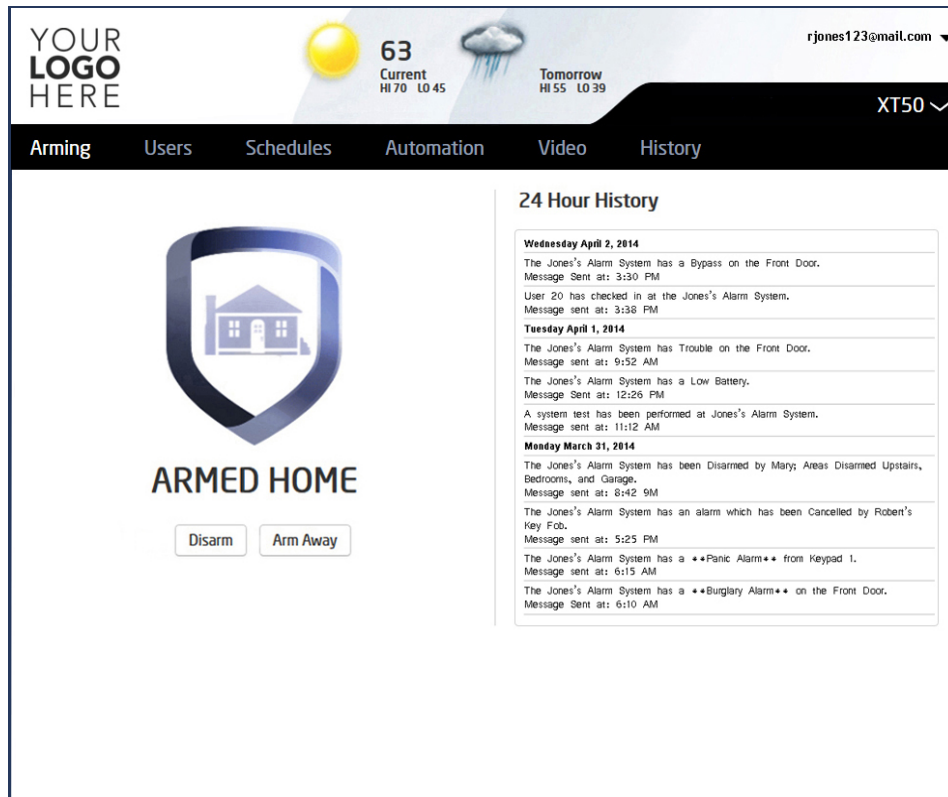

Home/Away Systems

Your burglary protection is divided into two areas:

- Perimeter and Interior - All arming arms both the Perimeter and the Interior of the system when leaving the building and no one is inside. Perimeter arming arms the exterior doors and windows and allows you to move freely about inside without setting off any interior alarms.

Arm Home

Click the Arm Home button to select. When armed, the shield displays blue with the Armed status and the Home icon in the center. When Home is armed you may choose Arm Away without disarming Home. When Away is selected Disarm is the only option displayed

Arm Away

Click the Arm Away button to select. When armed, the shield displays blue with the Armed status and the Away icon in the center.

Disarm Home/Away

Click Disarm for the option you wish to disarm. When disarmed, the shield displays blank with the Disarmed status and the Arm Home and Arm Away buttons.

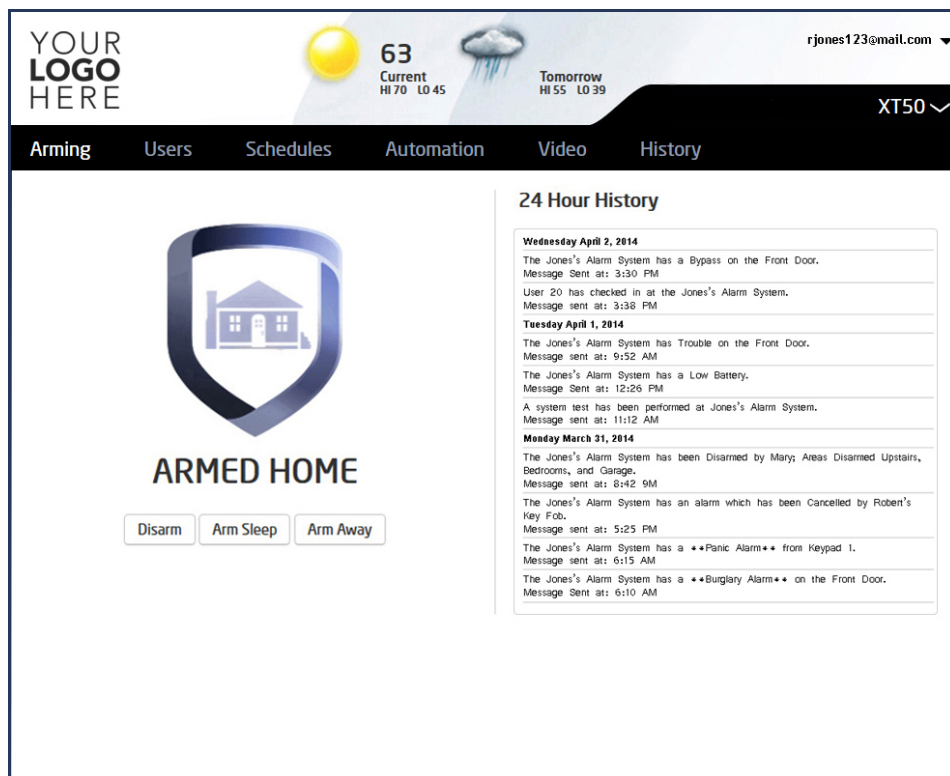

Home/Sleep/Away Systems

Your burglary protection is divided into three areas. Tapping the shield in the middle of the screen will display the following options.

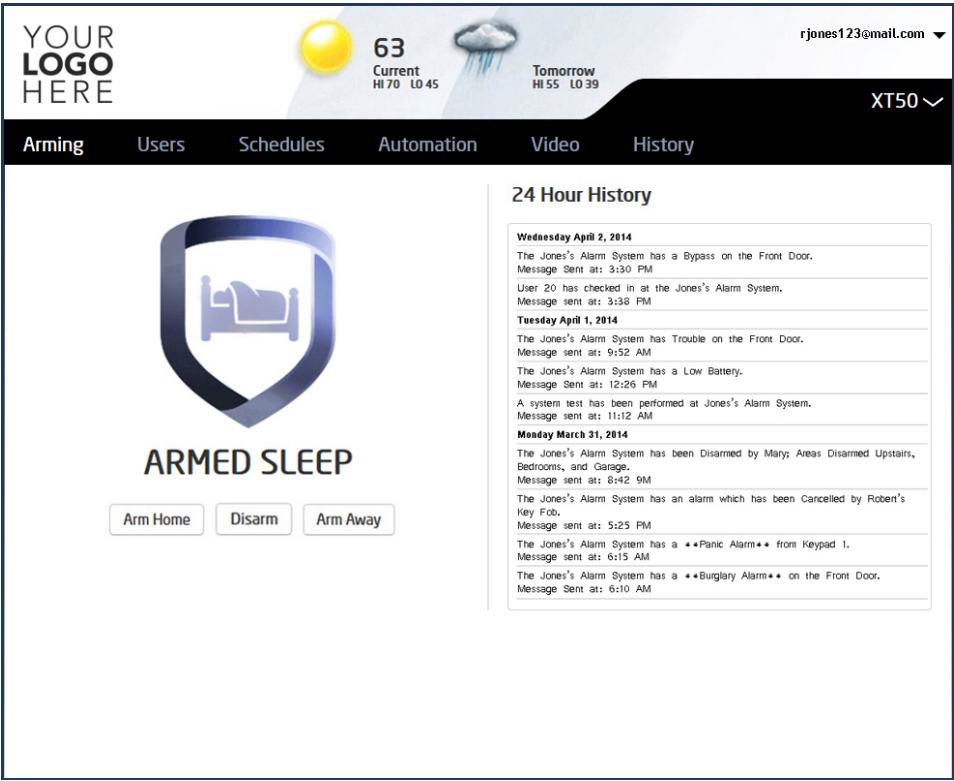

Home

HOME arming is for when you are staying inside but want the comfort of knowing the exterior doors and windows are armed.

Sleep

SLEEP arms all areas except those near bedrooms and night time areas.

Away

AWAY arms all three areas for when you leave the building and no one is left inside.
